| Development Matters | ELG <br> Early Learning Goal | How this is achieved in EYFS | By the end of EYFS learners will know how to |
| :---: | :---: | :---: | :---: |
| Reception <br> - Recognises some numerals of personal significance. <br> - Recognises numerals 1 to 5 . <br> - Counts up to three or four objects by saying one number name for each item. <br> - Counts actions or objects which cannot be moved. <br> - Count objects to 10 and beginning to count beyond 10 . <br> - Counts out up to six objects from a larger group <br> - Selects the correct numeral to represent 1 to 5 , then 1 to 10 objects. <br> - Counts an irregular arrangement of up to ten objects. <br> - Estimates how many objects they can see and checks by counting them. <br> - Uses the language of 'more' and 'fewer' to compare two sets of objects. <br> - Finds the total number of items in two groups by counting all of them. <br> - Says the number that is one more than a given number. <br> - Finds one more or one less from a group of up to five objects, then ten objects. <br> - In practical activities and discussion, beginning to use the vocabulary involved in adding and subtracting. <br> - Records, using marks that they can interpret and explain. <br> - Begins to identify own mathematical problems based on own interests and fascinations. | Number <br> - Have a deep understanding of numbers to 10. <br> - Subitise (recognise quantities without counting) up to 5 <br> - Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10 , including double facts <br> Numerical Patterns <br> - Verbally count beyond 20, recognising the pattern of the counting system. <br> - Compare quantities up to 10 in different contexts, recognising when one quantity is greater than, les than or the same as the other quantity. <br> - Explore and represent patterns within numbers up to 10 , including evens and odds, double facts and how quantities can be distributed equally. | - Provide collections of interesting things for children to sort, order, count and label in their play. <br> - Display numerals in purposeful contexts, e.g. a sign showing how many children can play on a number track. <br> - Use tactile numeral cards made from sandpaper, velvet or string. <br> - Create opportunities for children to experiment with a number of objects, the written numeral and the written number word. <br> - Develop this through matching activities with a range of numbers, numerals and a selection of objects. <br> - Use a 100 square to show number patterns. <br> - Encourage children to count the things they see and talk about and use numbers beyond ten <br> - Make number games readily available and teach children how to use them. <br> - Display interesting books about number. <br> - Play games such as hide and seek that involve counting. <br> - Encourage children to record what they have done, e.g. by drawing or tallying. <br> - Use number staircases to show a starting point and how you arrive at another point when something is added or taken away. <br> - Provide a wide range of number resources and encourage children to be creative in identifying and devising problems and solutions in all areas of learning. <br> - Make number lines available for reference and encourage children to use them in their own play. <br> - Help children to understand that five fingers on each hand make a total of ten fingers altogether, or that two rows of three eggs in the box make six eggs altogether. <br> - Developing a strong grounding in number is essential so that all children develop the necessary building blocks to excel mathematically. | - Know how to count confidently and develop a deep understanding of the numbers to 10, <br> - Recognise relationships between the numbers and the patterns within those numbers. <br> - Talk to adults and peers about what they notice and not be afraid to make mistakes <br> - Use vocabulary from which mastery of mathematics is built. <br> - Look for and spot patterns in numbers and shape <br> - Count reliably to 20 <br> - Order numbers 1-20 <br> - Say 1 more/ 1 less to 20 <br> - Add and subtract two single digit numbers <br> - Solve problems including doubling, halving and sharing <br> - Talk about and solve problems involving size, capacity, position, distance, time and money |
