

# TIMES TABLES ROCKSTARS

Monday 18<sup>th</sup> May 2020 Update

My apologies, it should have said Roxy last week, not Rosy! She has dropped back to second place with a lifetime earnings of 68 156, while Rhett is now in the lead, having amassed over 80 000 points.

We now have 7 players with over 10 000 points so well done to all of you.

I can see some of you have increased your speed as you get better at recalling your times tables. Aimee Rippler and Buzzy Rockbottom have done particularly well in improving their speed so the star of the week goes to them.

I have been contacted by several parents asking me to change their rockstar's challenges. I have also been looking to see how you are all doing with different tables, and have taken the decision to change some of them when I can see you are doing really well, (Roxy!) or reduced the number of tables you have to do.

If you find there are too many different tables, or not enough challenge, just e-mail the office and we can add or take away tables to make it more accessible for you. As a general rule, Y1 are doing the 10 times tables, Y2 are doing 2s, 5s and 10s, and after that for Years 4 – 6 it is up to 12x12 but this can always be changed to help you.

Keep playing, keep having fun and most importantly keep safe.

**HAPPY PLAYING ROCKSTARS!**
