

## Making Hedgehogs – 04/02/26

Despite being short staffed this week the children enjoyed creating their own hedgehogs after being told all about them in our outdoor classroom. Mr C brought in some clay and the children enjoyed finding hedgehog spikes to adorn their creations. Once the hedgehog was made it was time to create a habitat for it to live in (although these were short lived, as the children all took their hedgehogs home). Lots of fun was had with the clay and lots of learning took place without them even realising! Another successful session for our outdoor learning club. Next week, apples over the fire! (But we will be sure to check for hedgehogs!)
